One-seater Cumulus can have backrests of three different heights with convex surfaces produced of molded polyurethane details. The lowest part of the backrest has a bulkier cushion of cut polyurethane to ensure more comfortable back support.

Optionally you can have a table with a swivel table top. It is attached to the feet frame with two bolts. For one-seater model the table can be attached either to the left side or to the right side.

Cumulus construction comprises a separately produced backrest and a seat which allows you to combine two colour cover fabrics.

Separate Cumulus segments without one side panel can be arranged into groups in a zigzag form or into a circle.
